PRODUCT CATALOG

Welcome to Our Product Catalog

Innovative Solutions for Modern Business Challenges

Discover our comprehensive range of cutting-edge mobile printing solutions, rugged communication devices, and precision weighing equipment designed to enhance productivity and efficiency across diverse industries.

Each product in our catalog has been carefully selected and rigorously tested to ensure it meets the highest standards of quality, durability, and performance. Our solutions are trusted by professionals in logistics, manufacturing, healthcare, retail, and field services worldwide.

About Us

Brickspring provides a comprehensive suite of services and technologies that enable organizations to modernize their operations. Our offerings include IoT hardware, enterprise software, integration, development, and cybersecurity services. This encompasses everything from the physical devices (IoT) and their data collection capabilities, to the secure software platforms and infrastructure needed for managing that data, and finally to the professional services required to implement and maintain the entire system.

BS- V710 TOUCH SCREEN NFC SMARTPHONE

Rugged Enterprise Smartphone with Advanced Connectivity

The BS-V710 is a professional-grade rugged smartphone designed for demanding work environments. Combining modern Android functionality with industrial-strength durability, this device delivers reliable performance for field workers, security personnel, and enterprise applications requiring robust mobile computing.

Key Features

- Rugged Durability: IP68 waterproof and dustproof rating for harsh environments
- Large Display: 6.3-inch FHD+ touchscreen (2340×1080) with 480dpi clarity
- Extended Battery Life: Removable 5000mAh battery with quick charge support
- NFC Connectivity: Built-in NFC (NXP557) for contactless applications
- Enterprise Ready: Android 11 with comprehensive MDM integration

Technical Specifications

- Performance: MT6765 Helio P35 Octa-core processor (up to 2.3GHz)
- Memory: 4GB RAM + 64GB storage (expandable to 128GB with TF card)
- Camera System: 24MP+2MP rear cameras with macro capability, 5MP front camera
- Connectivity: Full 2G/3G/4G LTE, dual-band Wi-Fi, Bluetooth 5.0
- Navigation: GPS+GLONASS+BDS multi-satellite positioning
- Security: Side-mounted fingerprint sensor and comprehensive sensor suite
- Special Features: Push-to-Talk (PTT) button, wireless radio support, OTG function

Connectivity & Network Support

- Global Coverage: Comprehensive frequency band support for worldwide deployment
- Dual SIM: Two nano SIM slots for flexible carrier options
- Modern Interfaces: USB Type-C 2.0, expandable storage, charging dock compatible

Applications

Ideal for logistics, security services, field maintenance, healthcare, retail, hospitality, and any enterprise application requiring a durable smartphone with NFC capabilities and reliable connectivity in challenging environments.

Kshs 34,000

BS-L36 MOBILE BLUETOOTH PRINTER

The BS-L36 is a ruggedized mobile thermal printer designed for demanding field applications. This portable device combines reliability with versatility, making it ideal for logistics, retail, healthcare, and field service operations.

Key Features

- Dual Connectivity: USB and Bluetooth (2.0/4.0) for flexible connection options
- Rugged Design: IP54-rated protection with 1.5m drop-test certification
- Long-lasting Power: 2100mAh rechargeable Li-ion battery for extended operation
- Intuitive Operation: Built-in LCD display for easy status monitoring
- Versatile Printing: Supports 1D/2D barcodes, QR codes, and standard text

Technical Specifications

- Print Technology: Thermal line printing at 203 dpi resolution
- Print Speed: Up to 80mm/s (normal paper) / 60mm/s (label paper)
- Paper Compatibility: 58mm and 80mm thermal paper rolls
- Drop-in Loading: Easy paper replacement system
- Multi-Platform Support: Compatible with Windows, Linux, Android, iOS, and more
- Compact Dimensions: 123x112x67mm, weighing only 430g

Applications

Perfect for mobile point-of-sale, inventory management, shipping labels, receipts, tickets, and field documentation where portability and durability are essential. Integrated with Capture Manager (MDM) for seamless enterprise deployment.

Kshs 17,000

BS-T12 HAND-HELD BLUETOOTH PRINTER

Ultra-Compact Professional Mobile Printing Solution

The CS-T12 is an ultra-lightweight handheld thermal printer engineered for maximum portability without compromising functionality. This compact device delivers reliable printing performance for mobile professionals requiring efficient on-the-go documentation and labeling.

Key Features

- Ultra-Portable Design: Weighs only 190g - the lightest in its class
- Dual Connectivity: USB and Bluetooth options for versatile connection
- Reliable Power: 1500mAh rechargeable Li-ion battery for all-day operation
- Easy Operation: Drop-in paper loading with manual cutting
- Comprehensive Printing: Full 1D/2D barcode support including QR codes

Technical Specifications

- Print Technology: Thermal line printing at 203 dpi resolution
- Print Speed: Up to 62mm/s maximum speed
- Paper Compatibility: 58mm thermal paper rolls (40mm max diameter)
- Multiple Fonts: Three font sizes (8×16, 9×24, 12×24) for flexible formatting
- Multi-Language Support: ASCII, Chinese (GB18030, GB12345), Big5, and Codepage
- Cross-Platform SDK: Compatible with all major mobile and desktop platforms
- Compact Dimensions: 106.5×78×47mm - fits comfortably in hand or pocket

Applications

Ideal for retail point-of-sale, inventory tracking, field service documentation, healthcare patient identification, event ticketing, and any application requiring lightweight, portable printing capability.

Kshs 13,500

BS- HCS02 CRANE SCALE

Professional Heavy-Duty Digital Crane Scale with Bluetooth Connectivity

The HCS-02 is a precision-engineered crane scale designed for industrial weighing applications in demanding environments. Featuring advanced digital technology and wireless connectivity, this robust scale delivers accurate measurements for steel factories, maritime operations, construction sites, and heavy industry applications.

Key Features

- High Capacity Range: 1000kg to 10,000kg capacity options with strong ABS housing
- Wireless Connectivity: Bluetooth-enabled with dedicated mobile app for remote monitoring
- Superior Safety: 150% overloading safety margin with OIML approved load cell (S type)
- Professional Display: Large LCD screen with clear digital readout
- Extended Operation: 6V/4Ah rechargeable battery for long-term use

Technical Specifications

- Capacity Options: Multiple configurations from 1000kg to 10,000kg
- Load Cell: OIML approved S-type load cell for precision accuracy
- Safety Rating: 150% overload protection for enhanced operational safety
- Hardware: Standard American hook and shackle configuration
- Display Functions: ZERO, TARE, M+, MC, MR, PRINT, HOLD capabilities
- Power: 6V/4Ah rechargeable battery system
- Construction: Durable ABS housing with attractive design

Smart Connectivity

- Mobile App Integration: Dedicated smartphone app for weight monitoring and data logging
- Bluetooth Technology: Seamless wireless connection for real-time data transmission
- Remote Monitoring: Check weights from a safe distance via mobile device

Applications

Steel Factories: Precise measurement of steel products, rebar, and structural components

Maritime Industry: Cargo weighing, fishing operations, and marine equipment handling

Construction Sites: Material handling, crane operations, and load verification

Industrial Operations: General heavy lifting, inventory management, and quality control

Package Contents

- HCS-02 Crane Scale unit
- Rechargeable battery system
- Standard hook and shackle
- Mobile app access
- Protective foam packaging
- User documentation

Kshs 43,000

BS-OCS10A CRANE SCALE

Compact Digital Hanging Scale for Light Industrial Applications

This professional-grade digital crane scale offers precise weighing capabilities in a compact, portable design. Perfect for workshops, warehouses, small industrial operations, and field applications where accurate weight measurement is essential.

Key Features

- 100kg Maximum Capacity: Ideal for medium-duty weighing applications
- Digital LCD Display: Clear, easy-to-read weight measurements in multiple units
- Durable Construction: Robust blue housing with stainless steel hooks
- CE Certified: Meets European safety and quality standards

Technical Specifications

- Capacity: 100kg maximum weight
- Display Units: Kilograms (kg), Pounds (lb), Newtons (N)
- Display: 20mm LCD with back-light.
- Construction: Heavy-duty plastic housing with metal components
- Hook Design: Stainless steel top and bottom hooks for secure attachment
- Power: Battery operated (Rechargeable Lithium battery 3.7V 2000MAH) - DC 6V 800MAH.
- Security: Sealing point and calibration password

Control Functions

- Power Button: Easy on/off operation
- HOLD Function: Freeze display reading for recording
- UNIT Button: Toggle between kg, lb, and N measurements
- TARE/ZERO: Reset scale to zero or subtract container weight

Applications

- Workshop Operations: Tool and equipment weighing
- Warehouse Management: Package and inventory verification
- Agricultural Use: Feed, produce, and livestock applications
- Marine Applications: Fishing equipment and catch weighing
- Construction: Material verification and load checking
- Retail/Market: Bulk goods and merchandise weighing

BS-SB1 CRANE SCALE

Professional LED Digital Crane Scale with Remote Control

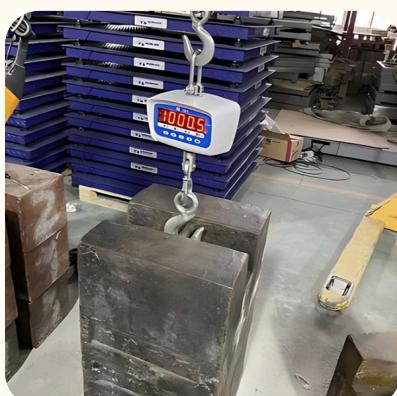

The ACS-SB-1 is a heavy-duty digital crane scale engineered for industrial weighing applications. Featuring bright LED display technology and wireless remote control, this scale delivers exceptional visibility and operational convenience for demanding weighing environments.

Key Features

- Multiple Capacity Options: Available in 100kg, 300kg, 500kg, and 1000kg models
- Bright LED Display: Large 1.5" red LED display for excellent visibility in all conditions
- Remote Control Operation: Wireless control with over 10-meter operating range
- Enhanced Safety: 150% overload protection with integrated load cell design
- CE Certified: European approval for commercial and industrial use

Technical Specifications

- Capacity Range: 100kg to 1000kg (multiple models available)
- Resolution: 3,000 divisions for precise measurements
- Power System: Rechargeable DC 6V/4Ah battery with DC 9V/1A adapter
- Display Units: Kilograms (kg) and Pounds (lb)
- Construction: Strong material construction with stainless steel shackle
- Display Type: Large, bright red LED for superior visibility

Design Features

- Rugged Build: Heavy-duty construction for industrial environments
- Integrated Load Cell: Built-in load cell design for enhanced durability
- Stainless Steel Hardware: Corrosion-resistant shackle and mounting components
- Easy Operation: User-friendly interface with simple control functions

Applications

- Industrial Manufacturing: Heavy equipment and material weighing
- Construction Sites: Load verification and material handling
- Warehousing: Inventory management and shipping verification
- Mining Operations: Bulk material and equipment weighing
- Marine Industry: Cargo and equipment handling
